80mm of height adjustment to allow for beach gradients

5 RUNG VERSION

- Breaks down into 4 easy to transport sections
- Main platform 2M x 0.33M wide
- Platform heights: 910/950/990mm
- Add-on side cantilever platform - 1.8M x 0.33M
- Lightweight but strong aluminium construction (mill finish) with round serrated rungs at each end
- "Hexagrip" phenolic faced plywood decking material (use board wax if surfing barefoot)
- Height adjustment at each end to allow for beach gradients
- End ladder sections- EITHER 3 rung- 0.9M long OR 5 rung- 1.4M long with 0.8M wide offset lateral stabilising bar featuring large plastic feet
- End sections secured with folding spigots attached to main platform and stainless steel detent pins.
- Diagonal braces lock into place with drop-nose pins on retaining chains
- Total weight when fully assembled- 18KG
- 150KG Safe working load
- Don't forget to wash it down after use !
